

DPD-2974-59

4 May 1959

MEMORANDUM FOR

:

SUBJECT

: Granger Box

25X1A9a

1. I have talked with Security regarding the dissemination of the technical data of the program which would be of interest to the defense community. There is no objection to the method of presentation suggested by [REDACTED]. It may be published as one paper or two. There are, of course, two restrictions. All matter must be classified as "SECRET" and the data must be written as general technical data that is completely sterile from our particular interests. I doubt that the paper will be held here more than three days. If [REDACTED] can submit it to us by 15 May, we can return it to him by 20 or 21 May.

2. We are most appreciative that [REDACTED] has offered to be available for technical consultant services until the completion of the next two boxes. This is not to say that we lack confidence in the present company capabilities, but rather that we feel that much valuable time may be saved with [REDACTED] help.

25X1A9a

3. A set of specifications for the equipment has been coordinated with Operations and submitted to Contracts. The specs., almost word for word as you suggested them, will be included as a letter attachment to the original contract.

4. For the moment, it looks as though all we can do is sit back and wait for the first new box. I have an estimate from the aircraft builder of his cost to modify two more birds. After I get some idea of the spare parts requirements, then I can see the total anticipated cost for Mr. B.
